

All Seasons Fund (UNAVX) Commentary  
February 2023

The All Seasons Fund ended the month of February with a return of -0.35%.

### Market Review

January's equity rally was fueled by the perception of a less hawkish Fed. February was a return to expectations that rates will remain higher for longer. Economic data came in hot to start the month with the nonfarm job payrolls and producer price index higher than expected.

Earnings data reported mostly in line with expectations – however, positive, and negative earnings surprises were rewarded and punished with above average moves post earnings. Technology stocks, in particular, benefited from the lowered earnings expectations coming into the month. Technology stocks outperformed most other sectors.

March will have several economic announcements that may move markets. The Federal Open Market Committee decision on March 22<sup>nd</sup> may offer insights into the rate path in 2023. Although the bond market expects at least another 25bps hike in March, there were some Fed members in favor of a larger 50bps hike in February. Any change to expectations may cause market turmoil with the onset of a fractured Fed.

The volatility index (VIX) rose slightly, but true investor fear remained muted in the options market. Portfolio hedgers were not overpaying for downside protection. We believe markets may be in a holding pattern as the Fed digests more economic data. Most notably, the lesser observed CBOE Skew Index (SKEW) remains on the low end of its range. We believe a low SKEW price may indicate signs of a complacent marketplace. In our experience, complacency is the most dangerous collective emotion in markets.

The All Seasons trading model has remained cautious in 2023 with lower-than-average trade conviction and shorter durations in positions. This is only a reflection of the model's expectation of risk/reward asymmetry for trading. We take no long-term directional view of markets. We simply trade when short term opportunities may exist.

Sincerely yours,

Paul Strehle

Investors should consider the investment objectives, risks, charges and expenses carefully before investing. For a prospectus or summary prospectus with this and other information about the Fund, please call 1-800-MUTUALS or visit our website at [www.USAMutuals.com](http://www.USAMutuals.com). Read the prospectus or summary prospectus carefully before investing.

Past performance does not guarantee future results. The performance data quoted represents past performance and current returns may be lower or higher. Share prices and investment returns fluctuate and an investor's shares may be worth more or less than original cost upon redemption. For performance data as of the most recent month-end please call 1-866-264-8783.

**Fund Objective:**

The All Seasons Fund seeks capital appreciation and preservation with lower volatility throughout market cycles. The resulting portfolio targets a high correlation to the S&P 500 in bull markets and a lower, or negative, correlation in bear markets.

**Standardized performance as of (12/31/2022) Fund Inception (02/01/2002)**

	1 Year	5 Year	10 Year	Since Inception
UNAVX	6.91%	5.50%	8.38%%	10.65%
S&P 500 Index	-18.11%	9.42%	12.56%	8.17%

Performance data quoted represents past performance; past performance does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance of the und may be lower or higher than the performance quoted. Performance data current to the most recent month end may be obtained by calling 1-866-264-8783. Returns over one year are annualized. The Gross and Net expense 2.36% and 2.01%. The advisor has contractually agreed to limit expenses to 1.99% of the average net assets of the Fund through 7/31/2023.

**Definitions:**

**S&P 500 Index:** An unmanaged composite of 500 large capitalization companies. This index is widely used by professional investors as a performance benchmark for large-cap stocks. You cannot invest directly in an index.

**VIX:** VIX is the ticker symbol and the popular name for the Chicago Board Options Exchange's CBOE Volatility Index, a popular measure of the stock market's expectation of volatility based on S&P 500 index options.

**CBOE SKEW Index:** A measure of the perceived tail risk of the distribution of S&P 500 investment returns over a 30-day horizon.

Simultaneous with the commencement of the Fund's investment operations on October 13, 2017, the Goldman Navigator Fund, L.P., a limited partnership managed by Mr. Steven Goldman, the Fund's portfolio manager (the "Predecessor Partnership"), converted into the Institutional Class shares of the Fund by contributing all its assets to the Fund in exchange for Institutional Class shares of the Fund.

Performance data quoted prior to October 13, 2017, represents the past performance of the Goldman Navigator Fund, L.P., a limited partnership managed by Mr. Steven Goldman, the Fund's portfolio manager (the "Predecessor Partnership"). From its inception in 2002 through 2012, the Predecessor Partnership was managed as a proprietary account of the portfolio manager and was converted to a limited partnership in 2012. From its inception on February 1, 2002, through October 13, 2017, the Predecessor Partnership maintained investment policies, objectives, guidelines, and restrictions that were, in all material respects, equivalent to those of the Fund, and at the time of the conversion, the Predecessor Partnership was managed by the same portfolio manager as the Fund.

Such portfolio manager managed the Predecessor Partnership since its inception in a manner that, in all material respects, complied with the investment guidelines and restrictions of the Fund. The Fund's performance for periods before October 13, 2017, is that of the Predecessor Partnership and includes the expenses of the Predecessor Partnership. The performance includes gains or losses plus income and the reinvestment of all dividends and interest. All returns reflect the deduction of all actual fees and expenses, paid by the Predecessor Partnership, without provision for state or local taxes. If the Predecessor Partnership's performance was adjusted to reflect the projected first-year expenses of the Fund, the performance for all periods would have been lower than that stated. The Predecessor Partnership was not registered under the 1940 Act and was not subject to certain investment limitations, diversification requirements, and other restrictions imposed by the 1940 Act and the Internal Revenue Code of 1986, as amended (the "Code"), which, if applicable, may have adversely affected its performance. On a going forward basis after October 13, 2017, the Fund's performance will be calculated using the standard formula set forth in rules promulgated by the SEC, which differs in certain respects from the methods used to compute total returns for the Predecessor Partnership. Please refer to the Financial Statements section of the Fund's SAI to review additional information regarding the Predecessor Partnership. [Click here](#) for a prospectus.

*Mutual fund investing involves risk; principal loss is possible. Leveraging may exaggerate the effect on net asset value of any increase or decrease in the market value of a Fund's portfolio. Investing in derivatives may subject the Fund to losses if the derivatives do not perform as expected. Short sales involve selling a security that a Fund borrows and does not own. Short sales carry significant risk, including the risk of loss if the value of a security sold short increases prior to the scheduled delivery date since a Fund must pay more for the security than it has received from the purchaser in the short sale. Futures contracts are subject to the same risks as the underlying investments that they represent, but also may involve risks different from, and possibly greater than, the risks associated with investing directly in the underlying investments. The Funds may invest in foreign securities which involve greater volatility and political, economic and currency risks and differences in accounting methods. This risk increases with emerging markets. Small and mid-size companies involve additional risks such as limited liquidity and greater volatility. Investments in futures may result in a substantial loss in a short period. The loss may be more than the original investment. One cannot invest directly in an index.*
