

Vice Fund Commentary
March 2022

For the month of March, the Fund was -2.12%.

Market Review

Rising inflation remained at the forefront of financial markets in March. The Federal Reserve raised the fed funds rate by 0.25% which was the first increase in 3 years. The Fed signaled a willingness to raise rates more aggressively at future meetings.

The war and humanitarian crisis in Ukraine continued to raise concerns about greater inflation and supply chain issues. The month ended with a new COVID variant that restricted business activity in Asia.

The fund was down on the month mainly due to fears of a prolonged COVID shutdown in China. We believe these fears played a role in Macau's casino stocks dropping to all-time lows. While COVID may be a short-term hindrance to these fund holdings, we believe these stocks may have a nice risk versus reward asymmetry going forward. These Macau casino stocks already took the brunt of the Chinese government regulatory storm last year, so we believe the upside may offer opportunity compared to downside risk with so much fear potentially priced into these stocks.

Sincerely yours,

Paul Strehle

IMPORTANT RISK INFORMATION:

Mutual fund investing involves risk; principal loss is possible. The Fund will concentrate its net assets in industries that have significant barriers to entry including the alcoholic beverages, tobacco, gaming and defense/aerospace industries, the Fund may be subject to the risks affecting those industries, including the risk that the securities of companies within those industries will underperform due to adverse economic conditions, regulatory or legislative changes or increased competition affecting those industries, more than would a fund that invests in a wide variety of industries. The Fund invests in foreign securities which involve greater volatility and political, economic and currency risks and differences in accounting methods. The Fund invests in smaller companies, which involve additional risks, such as limited liquidity and greater volatility. Derivatives may involve certain costs and risks such as liquidity, interest rate, market, credit, management and the risk that a position could not be closed when most advantageous. Investing in derivatives could result in losing more than the amount invested. If a security sold short increases in price, the Fund may have to cover its short position at a higher price than the short sale price, resulting in a loss.
